Catholic Church

Program for October
Empress—Mass, 1st, 3rd, 4th
and 5th Sundays at 11.15 a.m.
Cleveland—Mass, 1st, 3rd, 4th
and 5th at 9.30 a.m.

and is hereby confir

Hawtin—That approval of the Dept. of Highways be requested for relief road work N.W. 34-27-29 w3, S21; and N. of 35-27-29, v3, S42, in place of one East of North - East 10 27-29 v3.

Kinch—That approval of Dep. of Highways be requested, diverting relief road work to the extent of \$50, to N. of 8 24-27, w 3, from E. of 18-24-27 w 3.

Dahl - That the assessment roll be altered in respect of the assessment of N.E. 28-27 27 W 3, same to be assessed to T. O. Everson.

Kinch—That accounts passed by finance committee be paid, as under:

Empress Express, 7.00; do, 3.00; Alaska News, 7.00; Stempel & Patrick, audit, 86.28; Mantarphone, 196.00; do., 2.11; Trav. expenses, Sec. 47 (2), Cn. Dahl, Kindersley, 6.08; Sec. Treas., ditto, 1.47; Collector's expenses, 27.20; Sec. Treas., postage, tele. expenses, 32.85.

Hospitalization: — Eatonia,
Aug., 40 50; ditto, Sept., 36 00;
Alaska, 256 50.
Relief — Youngstown Flour
Mills, 108 50; Arneson Store,
1 00 + 5 00 + 5 00 = 11 00.

Office—R. E. Bishop, coml.
7 50; Empress Lumber Yards.

Maintenance machinery—
Richardson Road Machinery,
1764; Canada Ingot Iron, 549;

Men Make The State

Picking up a copy of the Moose Jaw Times the other day, the writer's attention was drawn to an article entitled "Men Make Cities" which opened by quoting the following inspirational lines of an unknown poet taken from the September issue of The Rotarian:

Cities are what men make them,
What men demand they shall be.
Slothful, sloven, and sleeping,
Progressive, beautiful, and free.
If the hearts of the builders are noble,
In one with the day and the need,
They will build into grandeur and greatness,
For so it was decreed.

These lines, it is stated, were inspired by the achievement of Alchison, Kansas, as told by Ed. W. Howe, editor of the Alchison Daily Globe. Alchison is one of the smaller cities, but in twelve years it has evolved from a bankrupt, tax-broke city, "slothful, sloven and sleeping," into one that is "progressive, beautiful, free," with its bonded debt cut 70 per cent, and even while this fine record was being made its tax rate was reduced by 35 per cent.

How was it done? In 1920 a group of citizens, noting the seriousness of the situation, started a movement to save the city, a new idea took hold of the administration, expenses were cut, and plans formulated to enable the taxpayers to handle the load and reduce the bonded debt and the overhead, and the creditable record was not interrupted through three years of the hardest times ever known, largely because lost courage and confidence was restored.

The Rotarian magazine tells the story in an editorial challenge to Rotarians in every city to be up and doing for the welfare of their home town—to study its problems and to act. The Moose Jaw Times applies it directly to its own city and declares the challenge comes at this time not only to Rotarians but to every member of every service club of Moose Jaw. The writer of this column in passing the story along would make bold to still further enlarge the field of its application from city or town to the citizenship of every community, large or small, because it is just as true that men—and women—make rural communities and little villages as it is that they make cities. It is also true that in these days our rural communities, hamlets and villages are confronted with problems, which, considering their population and resources, are just as heavy and serious as those of the larger cities—perhaps even more so.

Furthermore, because of the very nature and extent of the world-wide depression which has developed, all communities, large and small, find themselves much in the same position. One cannot in their emergency turn to another because all are adversely affected, and while the willingness to assist may be there the ability to do so is lacking. So communities are thrown back on their resources to a greater extent than formerly.

Again, this has resulted in much purely voluntary work by individuals and organizations being restricted, leading to both individuals and communities turning to and relying upon the State to take over and assume their problems. The net result is a weakening of the morale of the individual, a loss of courage and confidence, the development of habits of slothfulness, and a deterioration of initiative and enterprise. Instead of men adhering to the truth that they, as citizens, thousands are assuming the false theory that cities and nations make men, but that, instead of it being the duty and responsibility of men to order their lives and make their communities, it is the duty and responsibility of the State to order the lives and control the actions and destinies of the individual, thus reversing the order of the citizens controlling and directing the State.

Observant men and women are more and more coming to the view that the time has arrived to call a halt to this increasing reliance upon the State, and to renewed belief in the truth that, like the citizens of Alchison, Kansas, they must save themselves and their city by action on their own part; that instead of allowing their difficulties and problems to swamp and overcome them, they must overcome their problems and surmount their difficulties. It can be done. It has been done time without number by individuals and communities in the past.

Indeed, if it is not done both the individual and the community, large or small, faces ultimate disaster. The individual will find himself submerged and his individuality largely gone, while the community will end up in complete bankruptcy and the loss of its local freedom and autonomy.

On the other hand, if the men and women of a community, be it a small village or a large city, bestir themselves, face and study their problems, and proceed to grapple with them one by one, they will be surprised how much they can accomplish. It will mean the abandonment of existing policies of drifting with the adverse tides. It will mean the lifting off of this expenditure and that; it will mean the application of the most rigid economy in all public administration; it will involve a more active participation by the individual citizen in effecting community savings; it will necessitate the community sacrifices for a time just as thousands of individuals have had to make individual sacrifices. But it will mean ultimate success both for the community and the individuals who constitute and make the community.

In a word, it means a return to the proper and sound conception—that men make cities, not cities make men. And in using the term cities the application is to all organized communities whether rural or urban, large or small.

Dairy For Prince Albert

Believing Prince Albert is headed for better times, P. R. Glas, of Kerrobert, announced his plan to start a dairy there. During the past 12 months the value of tribulation of pasteurized milk and cream. He has acquired a 2,000 acre farm near the city and built a barn to house 40 Holstein cattle he intends to bring from Kerrobert, where he now operates a dairy.

Bath Tubs From England

Most of the imported baths and bath tubs which are used in Canada, Robert, announced his plan to start a dairy there. During the past 12 months the value of tribulation of pasteurized milk and cream. He has acquired a 2,000 acre farm near the city and built a barn to house 40 Holstein cattle he intends to bring from Kerrobert, where he now operates a dairy.

Opposums are becoming so numerous in New Zealand that they are a menace.

Chicago school teachers can't see much of them.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, the sufferer should be given the discharges checked before they become serious. To check these unusual discharges there is a remedy that has been on the market for the past 88 years. It is rapid, reliable and effective in its action. A few drops is generally all that is required to give relief. Get it at your drug or general store; put up only by The T. Millers Co., Limited, Toronto, Ont.

British Railway Regulation

No-Smoking Order In Compartments To Be Enforced

In future all passenger coaches on the London, Midland and Scottish Railway will bear a distinctive label, "smoking" or "non-smoking." About 10,000 vehicles, with a seating capacity of more than 1,000,000 will have to be dealt with. Probably in a year will elapse before the change-over is complete.

"We have had many complaints," said an official, "about people smoking in non-smoking compartments. They take the view that as smoking is not definitely forbidden they may smoke if they wish to do so. When the new labels are affixed on one will be allowed to smoke in a non-smoking compartment even if other passengers say they have no objection. Smoking is allowed in 75 per cent. of the coaches and it is not proposed to alter that proportion."

Other railway lines in the United Kingdom have carriages labelled in various ways, meant to indicate they are either for smokers or non-smokers.

CAST OFF UGLY FAT

Woman Loses 28 lbs. in 3 Months

"Three months ago," a woman writes, "I was persuaded to try Kruschen's to reduce my weight, which was 222 lbs. I had tried other ways, but nothing would do. I know that Kruschen's salts are different from three weeks I lost 5 lbs., and after five years' treatment I finally must say I feel a different woman. I have lost 28 lbs. to date." (Mrs.) S.G.B.

If you are overweight, take one glass of Kruschen's salts every day. It is a glass of hot water before breakfast every morning. It will not be rapid or alarming loss of weight, but it will give you a healthy, slim figure which is as unhealthy as it is ugly. Kruschen's is a scientific salt. It has been used by the waters of those European spas that have been used by generations of over- and overweight people to reduce weight.

Rising Tide Of Fascism

Warning Is Sound by Secretary Of Workers' League

Warning against the "rising tide of Fascism," as exemplified by the Blue Shirts in Italy, was sounded by J. C. Wilson, of Winnipeg, National Secretary of the Workers' League, at an open meeting of returned soldiers at Windsor, Ont.

"I understand the slogan of the Blue Shirts is 'Join us and get a job' but that does not amount to a hill of beans," Mr. Wilson said. "In Winnipeg we formed the Old Contemplatives and had the same slogan. The only job offered was to stand guard for a Fascist government. That is their role, the same role as Fascists in Vancouver, strong-arm, and in London, and in Steel Helmets of Montreal."

"As the time comes when you, as your economic needs, as the only effective weapon to combat the rising tide of Fascism and possible war in six months."

Pains After Eating?

Try This!

Pains after eating are generally due to an excess of acid in the stomach that forms gas and causes bloating, heart burn, bloating, sour stomach and indigestion. Bismuth Magnesia taken after meals will give quick and pleasant relief you will be surprised. Any druggist will tell you ordinary Bismuth Magnesia is fine for sour stomachs, constipation, it should be in every home. It works.

Tom of Viking Chieftain

Discover Grave Of Warrior Buried 1,000 Years Ago

The tomb of a Viking chieftain, buried more than 1,000 years ago, was recently found at Lingsjö, in central Sweden. The find clearly showed the warrior was of high rank and was furnished an interesting number of the burying customs of his day. He had been interred with full armor and with a fine sword, evidently made in the south of England.

The sword hilt was decorated with silver ornaments, on one of which a magic runes had been engraved.

Claims Fastest Plane

That his plane is faster than any other passenger-carrying type in the world is the claim of the inventor of a new machine in Italy, having the body in a cylindrical condition, through which currents of air pass to supply the propelling power.

Scotland's potato crop this year was so large that the digging gave work to hundreds of unemployed.

ONLY Four complete sets of poker hands will secure this handy flashlight (complete with batteries). Useful in the car or in the house and but one of the many valuable gifts given in exchange for **Turret POKER HANDS**.
Run ripened molasses... rich aroma... extra seal... Quality you want is a cigar... Quality you get in every pack of **Turret POKER HANDS**. Cut. And there's genuine economy too. You can get at least 50 cigarettes from a 20¢ package.

It pays to "Roll Your Own" with FINE CUT CIGARETTE TOBACCO SAVE THE POKER HANDS

Had Wet Landing

Passenger On Amphibian Plane Stepped Out Into Water

The pilot of a big amphibian plane coming toward New York one night recently found himself in a nice fog which he thought would be pretty sure later. According to instructions he landed at an outlying city and suggested that his passengers continue by rail. They all did, except one gentleman who said he was in a mighty hurry and would take a chance if the plane was going on. The pilot was going and let him stay. The fog got worse, but the passenger was untroubled. Two or three lines the pilot and co-pilot looked back and found him deep in a maze. He read right on until the plane had come down and stopped. Then, to the pilot's and the co-pilot's horror, he took up his suitcase, opened the door, and jumped nimbly out. It would have been all right but for the fact that, in view of the weather, the pilot had brought the amphibian down on the water instead of the land. They feared the gentleman out and dried him off and he hurried by town—New York.

Trying Something New

Rolling Across Atlantic In "Gyroboat"

In Plan Of Two Italians
Two Italians may attempt to cross the Atlantic in a barrel-like craft propelled solely by rolling. They are Captain M. Caminiti and his mechanic, Signor Ranzetta. The vessel, called a "Gyroboat," is a kind of buoy in the shape of a barrel with a revolving cable which gives it its speed. It is completely closed and will hold several people. According to word from Palermo the inventors completed their first trial by crossing the Straits of Messina in less than an hour. They made their "ship" roll simply by their own movements inside the barrel. The inventors intend to propel their vessel down the coast to Catania and there to stay while they perfect it. They claim they will be able to cross the Atlantic in it at "stupendous speed."

Forakes Northern Country

Trapper Has Lived In Sub-Arctic For Many Years

The far north country is a good place for a man with a family, who is "getting up" in years, to get out of. This is at least the opinion of T. W. Flynn, trapper, and he should know, for he's been wandering around up there since 1881.

Trapper, Trapper, North West

Polishman, who-chopper and Indian Agent, for 20 years, "Flynn" has had his home in the sub-Arctic. Now he is in Edmonton, retired by the government from his position as Indian Agent, and he's going to Cold Lake to settle down.

Belgium has only 150,000 unemployed

South Shields, England, is building 142 houses for the aged.

CREAMED CELERY AND GREEN PEPPER

One and half cups celery (cut in one-inch pieces); 1 green pepper; 3 tablespoons butter; 3 tablespoons flour; 1 teaspoon salt; 1/2 cup evaporated milk; 1/2 cup water; 6 slices toast.

Cook celery until tender. Drain and mix with sliced green pepper. Melt butter in double boiler. Add flour and seasonings. Blend thoroughly. Add gradually evaporated milk and water, stirring constantly until mixture thickens. Cover and cook ten minutes longer in double boiler, stirring occasionally. Add celery and green pepper. Serve on toast with desired sauce.

A Profitable Proposition

One rural subscriber who was renewing his subscription the other day to the Pictou, Nova Scotia Advocate, wrote out that he would not miss one issue of The Advocate.

Hereafter as a result of a recent experience, "Why," said he, "I hadn't been getting your paper I'd have missed a sale the other day at which I made several dollars on the purchase of a lot of it. I made enough to pay for the paper for two or three years in the one deal."

Use ST. CHARLES MILK

and your pies, puddings and desserts will have a new delicious melt-in-your-mouth flavor. Try it for creaming soups, sauces, and vegetables. In fact whenever a recipe calls for milk, it makes all good cooking BETTER!

Unjustified Pessimism Is Chief Trouble Of Wheat Market, In Opinion Of Western Economist

Unjustified pessimism is the chief immediate trouble of the wheat market, according to Dr. W. W. Swanson, head of the Department of Economics in the University of Saskatchewan, who was in Montreal.

The importing countries of Europe have not yet reached their pre-war average in wheat, Dr. Swanson claimed, and have considerably reduced their growing of rye. The lessening of imports in Europe was due to no increase in acreage, but to extremely high yields this year and last year. This, he suggested, could be taken as a permanent factor.

Dr. Swanson drew attention to the statement of E. W. Snow, American wheat statistician, that current United States government estimates of wheat stocks in that country were about 150,000,000 bushels too high and that there was actually no surplus wheat in excess of domestic requirements and a small carry-over for safety.

As to the "blue eagle" campaign in the United States, Dr. Swanson declined comment but to say he had never seen any of the wheat that had avoided the penalty of the personification of the eagle which it existed.

He had been a witness before the royal commission on the wheat and currency at Saskatoon and consequently declined to comment on the commission beyond an expression of admiration for the manner in which Canadian banks had met the world economic crisis and his opinion that the personification of the eagle was a complete guarantee its report would be constructive.

Problems Of Dairymen

Want Eastern Canada To Export Farm Amount Of Butter

Working through the National Dairy Council, the three prairie provinces have made united efforts to induce manufacturers in eastern Canada to export a fair quantity of butter. That effort started right after a Canadian dairy butter surplus of 9,000,000 pounds was announced August 10. To this date the western provinces have received no indication that any butter would be shipped to the old country from the east, according to R. E. Reed, Saskatchewan Dairy Commissioner and Secretary of the Western Dairy Association.

Mr. Reed said Saskatchewan had shipped slightly more than 1,000,000 pounds to the market overseas. That business, he declared, was done at a net loss, the loss being heavier in the earlier shipments than the later ones, the result of better prices obtaining in England.

Model Of Tower Bridge

London's Famous Structure Reproduced By Farmer With Crude Tools

A model of London's famous Tower Bridge, eight feet long, two feet high and 14 inches wide, has been made from wooden blocks of the packing or cigar variety by B. O. Brown, head, farmer of Lynden, Saskatchewan.

It took two winters of steady application to the job and three-and-one-half weeks to paint it.

The tools were a small plane, jack-knife, razor blades, fret saw, scrap glass and sandpaper. Gopher tails were used for paint brushes.

Although he has never seen the structure he set to work and built it for his son. He has not seen the bridge, as it stands in London, either.

A Strange Plant

Bursts Into Life After Sleeping For Ten Years

Horticulturists were surprised and puzzled recently at the behavior of a South African "Cyclops" plant, which suddenly burst into life at the Royal Botanical Garden in London, England, after sleeping for 10 years.

The plant was found in the South African section of the Wembley exhibition in 1922. It was then a stick and was taken to the botanical garden, where it slept until last March when suddenly leaves sprouted from the trunk and within a week or two it was covered with beautiful foliage.

Consumer Wants Good Honey

Demand Same High Standard As In Other Foods

In the case of a food product the producer owes to the consumer extreme care in preparation of that product for the market to see that it is wholesome, clean, attractively packed and equal to the standards under which it is advertised and labelled. The honey producer had things very much his own way until a few years ago because demand exceeded supply and honey sold quite readily without too much fussing around with it. Today, however, conditions are somewhat different. More honey is being produced competitively than before and the consumer public has become more discriminating in its choice. The consumer has been educated to buy goods graded to definite and uniform standards and is demanding similar standards for honey and these demands cannot be ignored. The consumer is willing to pay for quality produce and as he has the final say as to what he shall buy, his wants must be considered. The producer who fails to recognize this fact might just as well change his position from bee-keeper to C. B. Gooderham, Dominion Aspartic.

Musher Was Disappointed

Valuable Toboggan Team Is Lost By Indian

Rod Garlick, Swampy Cree Indian, of the Hudson Bay Railway country up near Betting Lake, is disappointed. He counted on having a knockout dog team this winter, but the animals are all dead.

Rod was on the hunt this spring when he came across a timber wolf and six pups. The pups were dandies. Three were black, and three were all white. They were good, hefty animals, even as pups. Rod got them into camp, and passed them, figuring on training them from puppyhood, and to have a smart dog team.

He went away on a trip. The wolves did not take to the food supplied them. When he returned he found five dead. He picked up the sixth. It passed away in his arms.

Tenants Had To Use Ladders

Burglars Stole Staircase From Apartment House In France

Not even staircases are safe from the twentieth century Parisian burglar.

Tenants living on the third floor of a French apartment house got up to go to work one morning and found they couldn't go. There was no staircase. It had been removed in the night by burglars.

Telephones and windows had been left intact, however, and while some shouted across the street to their incredulous neighbors others telephoned the municipal police, who eventually called out the fire department. Thirty deer dwellers had to use ladders for the next two weeks while new stairs were being installed.

Alberta Editors To Meet

Alberta division of the Canadian Weekly Newspapers Association will hold its annual convention in Edmonton October 20 and 21. It is announced following an executive meeting here.

Aeroplane are delivering supply to ice-bound lighthouses near Warnamunde, Germany.

Some strange kinds of caterpillars can live under water.

AN IMPORTANT UNDER ENSEMBLE

THAT FITS THE FIGURE

GIVES SLENDER APPEARANCE

Here's a pattern that includes gentle to match your slip. Think of the time you have so often wasted trying to buy a slip and panic that match.

You can make this darling set in a single morning. It's simplicity itself. It's surprising how little it will cost you.

The slip, cut on princess lines—a few saunders to be joined—lath the neck and hem with tulle. The pattern is a little more elaborate, but not too full. The edges are trimmed with narrow lace to match the lace on the slip.

It's very effective in pale pink or white with extra lace. The edges may also be finished with bias bands.

Style No. 546 is designed in sizes 12, 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 3 1/2 yards of 38-inch material, with 3 1/2 yards of 2-inch lace and 2 yards of 5-inch lace.

Price of pattern 20 cents in stamps (a coin is preferred). Wrap coin carefully.

Makes Gift-Giving Easy

Indian Ruler Solved Difficulty Of His Poorer Subjects

If you wish to present a gift to the twenty-one-year-old Maharajah of Travancore, India, he will supply it for you. He recently decided this. According to Hindu traditions, when a young man goes to pay his respects to his ruler he must offer a gift of either silk or silver or gold, and the gift must be according to his station in life. The personal fortunes of many of the princes have been built up on this principle. The Maharajah of Travancore realized the injustice of this practice, and now, if you go to see him, you will find at the entrance gate a man in attendance who will give you a roll of silk or a few gold sovereigns which you present to the ruler. He accepts them, and his secretary takes them back to the guardian at the gate for the next visitor.

Preventive medicine is a new field of preventive medicine awaits the development of the science of medicine. If the medical profession is to take part it must be prepared to act as a group. In addition to local organization taking its part in public health, the profession must be organized nationally and internationally so that it would assume in the realm of preventive medicine.

Dr. Fleming declared progress in the field of preventive medicine awaits the development of the science of medicine. If the medical profession is to take part it must be prepared to act as a group. In addition to local organization taking its part in public health, the profession must be organized nationally and internationally so that it would assume in the realm of preventive medicine.

Nutritive Value The Same

Frozen Meat As Good As Fresh

Research Committee Reports

Frozen meat is as good as fresh meat, according to the research committee of the Royal Agricultural Society of England. The committee has reported having acquired of the department of scientific and industrial research regarding the relative merits of fresh meat as compared with dried, chilled or frozen meat.

A reply had been received from the ministry of health stating that on the knowledge at present available there is no recognizable difference in nutritive value as between frozen or chilled and fresh meat of similar quality. Further, there was no evidence that modern methods of canning affected the nutritive value to any greater extent than ordinary cooking.

Canada's Sugar Refineries

Sugar refining is a considerable industry in Canada. Eight refineries operate in the Dominion: One at Dartmouth, Nova Scotia; one at Saint John, New Brunswick; two at Montreal; one at Chatham, and one at Wallaceburg, Ontario; one at Raymond, Alberta, and one at Vancouver, British Columbia. The value of production from these eight refineries in 1932 was \$4,022,588.

Motion picture theatre in New Zealand are being reformed under the government subsidy for building and repairs.

BABY SUBMARINE TO SEEK LUSTANIA'S TREASURE

S. S. LUSTANIA. EXPLORE'S MECHANICAL PARTS

Using his 22-foot submarine, "Explorer," Simon Lake, famous inventor of underwater craft, hopes to succeed in a forthcoming attempt to reach the wreck of the liner "Lustania," in her ocean grave off the Irish Coast, where she was torpedoed in 1918. The diminutive submarine attained a depth of 300 feet in initial tests in Long Island Sound recently and as the sunken liner lies in only 100 fathoms, the Lake expedition an excellent chance of succeeding in the venture. The strong room of the liner is said to contain about \$1,000,000 in gold and silver, as well as a large quantity of precious stones and other jewelry.

Keeping Standard Measurements Is One Of The Most Difficult Problems Confronting Scientists

Preventive Medicine

Mental Health Is Just As Important

As Physical Health

Preventive medicine is a new field of preventive medicine awaits the development of the science of medicine. If the medical profession is to take part it must be prepared to act as a group. In addition to local organization taking its part in public health, the profession must be organized nationally and internationally so that it would assume in the realm of preventive medicine.

An Economic Garden

Includes Diverse Plants From All Parts Of World

An economic plant bed is being established in Boston's public garden. It is composed of 34 different plants from all parts of the world which provide man with needs from Panama base to Tasmania.

Plants selected for the bed include: Black pepper, pineapples, ginger plant, corn, silk oak, vanilla, nutmeg, fig, sugar cane, calabash tree, papaya, Mexican corn tree, fennel, tobacco, stemless screw pine, Malay candle nut, galligator pear, May apple, also, bearing hemp, date palm, cucumber tree, coffee plant, thatch plant, cotton plant, fan palm, and banana tree.

Egg Export Trade Better

Larger Section Of Country Is Interested This Year

Steadily increasing activity in the export trade furnished practically the only item of interest on the egg market during a recent week, states the market report of the Dominion Department of Agriculture. Some centres, notably Vancouver, are already shipping 200,000 eggs a week, and numbers of other cities export shipments are beginning to move. It is a long time since interest in the egg export trade was spread over such a large section of the country as is the case this year, the report added.

Makes Difficult Ascent

A. H. Marshall, of Vancouver, B.C., a member of the Seattle Mountaineering Club, and John Nielson, instructor of languages at the University of Cincinnati, recently reached the summit of soaring Granville peak near Red Lodge, Montana, after a day and a half of arduous climbing.

Marshall and Nielson were the sixth and seventh persons ever to scale the peak.

There are about 205 navigable streams in the United States.

France Is Worried Over Danger From The Hitler Menace

Paris, France—A show-down on disarmament is looked for by France at the fourth coming disarmament conference at Geneva.

The "Hitler menace," as officials publicly describe the present German regime, makes talk of disarmament at this juncture in European affairs a real danger, they say.

Joseph Paul-Boncour, mild mannered minister of foreign affairs, will head a delegation to Geneva which will argue this way.

Officials as well as the press believe that the gravity of the Austro-German dispute and acknowledged territorial ambitions of the German Nazi Government have opened the eyes of all of Germany's neighbors, and that at no time since 1918 has the future of Europe been more in doubt.

The French want to keep their gigantic war machines acquired as a result of the war and they are going to ask the world at Geneva:

1. To tabilitate their guns and equipment at their present levels.

2. To set up an international armament control system to keep a sharp eye on the moves of all countries and to ferret deep into budgetary expenditures for military purposes.

Unwillingness to scrap any major part of their present armament plant is general, until after the control plan has proved its effectiveness and check upon further aggression.

Public opinion is united for the first time since the war on the necessity for vigilance.

The Austro-German situation appears to French eyes to hold the seeds of another general European war. The French are impatiently waiting for the League of Nations to take this view into bold relief.

The French are counting on support from Great Britain and the United States. Paced with French proposals for limiting armaments and for a control scheme, the Germans are expected to restate their contention that they cannot accept any schemes whatsoever until they have been accorded equality of rights, including equality of arms.

Record Price For Beef

Springfield, Mass.—A new record price for beef steak on the hoof was paid at the baby beef auction at the Eastern States exposition, when the grand champion cowled by Theresa Graef, of Pine Plains, N.Y., brought \$11.15 per pound at auction. This compares with a previous record of \$10.50 paid at the East St. Louis Fair last year.

Morphine Case

Victoria, B.C.—Stacks of dried poppy heads were backed in the court room as material evidence in the trial of a Hindu named Gurn on a charge of possessing morphine pills. Royal Canadian Mounted Police recently seized a truckload of poppy heads from city and San Jose, Calif. Gurn was the first case arising out of the seizure. The case was adjourned.

American Section At Geneva

Geneva, Switzerland.—The American Minister to Switzerland, Hugh R. Wilson, practically living in Geneva, and with five members of the consular staff headed by Prentiss B. Gilbert, devoting themselves exclusively to League of Nations questions, the league decided to inaugurate a special American section.

Political Tension Shown At Opening Of League Of Nations Assembly

Geneva, Switzerland.—The state of political tension existing in Europe was exemplified as Swiss detectives from many cities began mobilizing to reinforce Geneva police on the eve of the League of Nations assembly and could meet with the disarmament conference.

The purpose was said to be primarily to protect the lives of German delegates.

Opening of the conference began a period of intense activity in the city. That the very peace of Europe is the stake of negotiations about to commence was the consensus of opinion.

Northern Air Route

Winnipeg Expected To Be In Important Position In Trans-Atlantic Service

Ottawa, Ont.—While it is too soon to predict the role that Winnipeg will play, it is learned here on official authority that negotiations for a trans-Atlantic air service are now rapidly reaching a final stage. The three countries that will co-operate in this venture are the United States, Canada and Great Britain and the route will be north across Labrador or Hudson Bay to Greenland, thence to Iceland and to the British Isles.

The negotiations are now proceeding at London, where the Canadian government and, probably, the Canadian Airways, are represented. The United States participant is the Pan-American Airways, Limited, and the British negotiator is the British Airways.

An announcement of the plans for an early trans-Atlantic service is expected within six weeks.

It is not known here if the plans will call for a branch line from Chicago to Winnipeg and thence north-east to tap the main line, but it is said that this possibility is being considered.

Canada's New Loan

Will Be Used Chiefly For Refunding Maturing Bonds

Ottawa, Ont.—The Dominion government loan will be "substantially less than \$250,000,000," according to a high official of the finance department. It will be "essentially" re-funding loan and a modest financial transaction in every sense of the word," the official added.

The date and interest rate of the new loan has not yet been fixed. Officials are confident the public will take the opportunity to convert their maturing bonds into new long-term securities at a slightly lowered interest rate.

The loan is chiefly for the purpose of refunding the \$169,000,000 worth of victory bonds maturing on November 1 a total of some \$10,000,000 maturing at the same time. The total issue will be only slightly in excess of these requirements.

May Recall Film Stars

German Members Of Hollywood May Have To Return To Germany

Hollywood, Cal.—German members of the film industry regarded with suspicion a report from Berlin that a move was on foot to demand their return to the fatherland to participate in the nation's rebuilding.

Marlene Dietrich, Dorothea Wieck, Ernst Lubitsch and many other Hollywood celebrities would be affected by the order now being discussed by the Film Reichsausschuss, the controlling motion picture organization there, and said to be favored by Adolf Hitler.

Boy Takes Long Journey

Edmonton, Alberta.—Adopted by his aunt and uncle, Mr. and Mrs. R. A. Slunt of Edmonton, eight-year-old Walter Houghton, travelled alone from Cape Town, South Africa, to the Alberta capital with his mother and father had died. The boy said he enjoyed the 12,000 mile trip and is eager to see his first snowfall.

Favors Tariff Cut

Controlled Inflation And Lower Tariffs Favored By U.S. Official

Chicago.—Secretary of Agriculture Henry Wallace told the United States Grain Dealers' Association that he still favors controlled inflation.

Along with this he criticized high tariff psychology and warned that attempts to fix prices "without control of production is doomed to failure."

"Most of the price fixers are also inflationists," he said. "If the purchasing power of farm products does not improve during the next three months, the price fixers and inflationists will have great power in congress this winter and there will be passed legislation which will make the Agricultural Adjustment Act seem extraordinarily conservative."

Secretary Wallace said he looked for decidedly higher agricultural prices within a few months, but that he felt the improvement might come to a end and if we are not prepared to meet the peril produced by the following forces:

"First, America is a creditor nation to the tune of \$1,000,000,000 annually. As a nation, we are a debtor people."

Second, the American people are still essentially high tariff in their attitude. Third, the American people are disillusioned about lending money abroad, and it will be difficult to float foreign loans in their present mood.

"These three forces mean that for the time being our people are profoundly nationalistic, and that as long as they are operating on this basis we should go at it wholeheartedly to put our internal economy on a nationalistic basis, and to keep our crop law enforced by 40,000,000 acres."

"If we persist in our high tariff policy or even in a half-way modification of it, and at the same time collect in full the money which is owed us abroad, and refuse to lend money abroad, we shall be superfluous human efforts on the part of the agricultural adjustment administration year after year to keep down our average to a point which will mean a living price to American farmers."

No More Free Gas

Say Joy Riders From Alberta Obtain Gas Free Gas Privilege

Victoria, B.C.—Joy riders from Alberta have been obtaining free gasoline in British Columbia, according to Hon. W. M. Dennis, British Columbia Minister of Labor, just returned from a trip to the Okanagan and Kootenay districts.

Mr. Dennis said families were driving across the inter-provincial line in old cars and asking for free fuel and a supply of gas to move toward. Most municipal officials find it cheaper to speed them on their way with gas instead of harboring them.

The minister said word apparently spread to the prairies and increased the flow of ancient cars from Alberta into the southern section of the province.

Mr. Dennis issued orders no more free gas be supplied to prairie itinerants.

Made Graduate Trip

Edmonton, Alberta.—Four Edmonton youths have completed the treacherous 250-mile canoe trip down the Saskatchewan River and tributaries from Rock Mountain House to this city. The dangerous waters upset their canoe once, the occupants narrowly escaping death. The canoeists are Bert Wilson, his brother, Howard, Robert Brown and Allan Brailles.

CABINET TROUBLE MAY UPSET DOLLARS

Ottawa, Ont.—A warning to those who might be tempted to melt down gold coins in order to secure the high price now prevailing for the new metal, is contained in a statement issued by the Department of Finance.

Section 25 of the Currency Act provides that the penalty for illegally melting with gold coin shall be a fine not exceeding \$250, or imprisonment for not more than 12 months or both fine and imprisonment.

The capital structure of this corporation would be made up by Dominion and provincial governments, together with some contribution from the borrower. Credit from it should be made available at the lowest cost as a matter of public policy.

The Dominion government should adopt measures designed to raise the level of agricultural prices "to a point where would restore the farm income," the committee asserts.

International co-operation to that end should be undertaken. Also, some solution of the debt problem in western Canada must be found if people are not to be driven from the farms. With this end in view the committee suggests amendments to the Bankruptcy Act, "so as to provide facilities by which insolvent farmers may secure cheaply and quickly a composition and extension of their debts, secured and unsecured, which will be binding on all their creditors when approved by the appropriate court."

It is also suggested that, in cases where bankruptcy proceedings can be avoided, power be given to the debt adjustment boards of the respective provinces to enable compromises and adjustments of farm debts.

Evidence submitted to the commission indicated "widespread dissatisfaction" with regard to interest charges on farm loans, and also with the banks making them.

NEW DEPUTY MINISTER

Dr. R. E. Weddhouse, Executive Secretary of the Canadian Tuberculosis Association, who has just been appointed Deputy Minister of Pensions and National Health for the Dominion.

U.S. Army Plane Carries Instruments Four Miles Above Earth

Riverdale, California.—Using army bombing planes to carry their sensitive instruments nearly four miles above the earth, Dr. Robert Millikan, noted Pasadena scientist, and his assistant, Dr. Victor Neher, have resumed their efforts to learn more about the cosmic ray.

An army pilot, garbed in 25 pounds of winter flying clothes and equipped with oxygen breathing facilities which he is compelled to use about 15,000 feet, flew the instruments to 15,000 feet recently.

The plane remained at that altitude an hour and 15 minutes and at 15,000 feet for a similar period. Dr. Neher said he plans several flights daily for two weeks.

Similar tests were conducted on the half of Dr. Millikan in Northern Manitoba in 1932. On that occasion a Royal Canadian Air Force plane made altitude flights after being lifted out as an aerial-laboratory.

Study Cosmic Rays

U.S. Army Plane Carries Instruments Four Miles Above Earth

Riverdale, California.—Using army bombing planes to carry their sensitive instruments nearly four miles above the earth, Dr. Robert Millikan, noted Pasadena scientist, and his assistant, Dr. Victor Neher, have resumed their efforts to learn more about the cosmic ray.

An army pilot, garbed in 25 pounds of winter flying clothes and equipped with oxygen breathing facilities which he is compelled to use about 15,000 feet, flew the instruments to 15,000 feet recently.

The plane remained at that altitude an hour and 15 minutes and at 15,000 feet for a similar period. Dr. Neher said he plans several flights daily for two weeks.

Similar tests were conducted on the half of Dr. Millikan in Northern Manitoba in 1932. On that occasion a Royal Canadian Air Force plane made altitude flights after being lifted out as an aerial-laboratory.

Kitsilano Boys' Band

Have Accepted Invitation To Play At Crystal Palace, London

Vancouver, B.C.—Kitsilano Boys' Band, which won honors across Canada, has accepted an invitation to play next summer in the Crystal Palace, London, England, according to Hon. W. M. Dennis, British Columbia Minister of Labor, just returned from a trip to the Okanagan and Kootenay districts.

The youthful musicians took the Pacific Northwest and British Columbia honors in 1931-32, the Canadian championship at the Canadian National exhibition in 1932 and the world's championship in their class at a Century of Progress Fair in Chicago recently.

Warning Is Given

Heavy Penalty For Melting Down Gold Coins

Ottawa, Ont.—A warning to those who might be tempted to melt down gold coins in order to secure the high price now prevailing for the new metal, is contained in a statement issued by the Department of Finance.

Section 25 of the Currency Act provides that the penalty for illegally melting with gold coin shall be a fine not exceeding \$250, or imprisonment for not more than 12 months or both fine and imprisonment.

United States Farmers Demand Protection Of The N. R. A. Code

Des Moines, Iowa.—The United States Farmers' Holiday Association, meeting here, voted unanimously to declare a farm strike on all products and ask the co-operation of Labor in its demands, embodied in N.R.A. codes, are not complied with by the administration.

The group of 1,200 persons, representing approximately 18 of the country's 48 states, adopted a resolution which declared: "We recommend that the board of directors of the National Farmers' Holiday Association appoint a committee to present these terms to the president. And if he fails to comply we will withhold all farm products from the market and we will withhold all state organizations to hold a strike call in readiness."

The code for agriculture adopted by the meeting called for a guarantee of cost of production prices on agricultural products, a maximum work day of 10 hours except in cases of emergency and the setting of wages by the American Federation of Labor.

The demands to be made upon the president and the recovery administration, non-compliance with which would be accepted as grounds for calling the strike, were:

Alberta Hail Insurance

Amount Carried The Lowest For Fourteen Years

Edmonton, Alberta.—Hail insurance carried in Alberta this year was the lowest for 14 years according to H. A. Tovel, manager of the provincial hail insurance board, which met here recently. The small amount carried, he believed, was due to the smaller crops this season.

Hail loss for the season was slightly more than \$23,000, in proportion to the risk since the board's inception in 1919. There were \$2,024 acres insured at \$3 per acre; 63,445 acres insured at \$5 per acre, and 101,676 at \$6.

Although the amount insured was lower than last year, the risk was close to \$1,000,000, he concluded.

Studying Tax Problems

Winnipeg, Man.—J. A. Byng, commissioner of income taxation for Saskatchewan, was in Winnipeg to consult with D. C. Stewart, Manitoba administrator of income taxation, concerning means of eliminating overlapping taxation as respects individuals subject to taxation in both provinces.

Relief Camps

Edmonton, Alberta.—Officials of the Department of Defence at Ottawa are conferring with Alberta government officials on the opening of single jobs and camps in this province, to be under the defence department's supervision.

Agricultural Credit Corporation Is Suggested By Western Committee

Ottawa, Ont.—The setting up of an agricultural credit corporation which would operate on a non-profit basis is suggested in a brief presented to the royal commission on banking by a special western interprovincial committee appointed by premiers of the three prairie provinces.

The capital structure of this corporation would be made up by Dominion and provincial governments, together with some contribution from the borrower. Credit from it should be made available at the lowest cost as a matter of public policy.

The Dominion government should adopt measures designed to raise the level of agricultural prices "to a point where would restore the farm income," the committee asserts.

International co-operation to that end should be undertaken. Also, some solution of the debt problem in western Canada must be found if people are not to be driven from the farms. With this end in view the committee suggests amendments to the Bankruptcy Act, "so as to provide facilities by which insolvent farmers may secure cheaply and quickly a composition and extension of their debts, secured and unsecured, which will be binding on all their creditors when approved by the appropriate court."

It is also suggested that, in cases where bankruptcy proceedings can be avoided, power be given to the debt adjustment boards of the respective provinces to enable compromises and adjustments of farm debts.

Evidence submitted to the commission indicated "widespread dissatisfaction" with regard to interest charges on farm loans, and also with the banks making them.

Cost of production in conformity with the agricultural code, a definite and specific pledge that congress will enact the Frazier Bill at the next regular session of congress, and the of the soldiers' bonus by a inflation issue; immediate use of the inflation power of the president.

The Frazier Bill introduced in congress by Senator Frazier of North Dakota, provides for government refinancing of farm mortgages at 1 1/2 per cent interest and 1 1/2 per cent amortization each year, the cost to be paid through the issuance of currency.

The association held producers might have to assume control of economic functions to secure justice, pledged its support to labor, and the association of farmers in its aims, and condemned Secretary of Agriculture Henry A. Wallace and the crop reduction methods of the United States Government.

The code, as adopted, called for application of the National Recovery Act to agriculture in order to "perpetuate the status of the farmer as co-operative action," and to "utilize the full resources of agriculture."

Growth Of Empire Trade

Exports For August Of Very Encouraging Nature

Ottawa, Ont.—Exports to British Empire countries in August, exclusive of those to the United Kingdom, were in value \$4,074,000. This was an increase of \$22,000 over August last year and the highest since November, 1931, when the total was \$4,372,000, according to the Dominion Bureau of Statistics.

The largest export last month was to Australia, valued at \$466,000, an increase of \$101,000, in which lumber from British Columbia played a conspicuous part.

Exports to the Irish Free State, Newfoundland, Bermuda, the British West Indies, the British countries of Africa, British Guiana, Hong Kong, Palestine and British Oceania, all showed gains last month.

Relief Camps

Edmonton, Alberta.—Officials of the Department of Defence at Ottawa are conferring with Alberta government officials on the opening of single jobs and camps in this province, to be under the defence department's supervision.

Dr. Engelbert Dollfus, Austria's "pocket" Chancellor, has been warning a strong fight against Nazi encroachment in Austria, and now reports from Vienna state the conservative leader is having troubles in his Cabinet. Here we see the Austrian Chancellor (right), a packet of concentrated dynamite, standing beside Baron Franchet-Bressy, one of his right-hand men.

Marvel Of Spider's Web

Perfect Piece Of Engineering And Strength Is Remarkable

There are few things more beautiful and symmetrical than the "cousin" web found in the garden, spun from the 150 spinnerets which the garden spider carries at the hinder extremity of the abdomen. It is a marvel of engineering perfect on which never micarries.

The radiating "guy ropes" are first made secure, and these form the foundation of the exquisite pattern of whorls which form the web. The strength of the web is amazing, generally resisting the desperate struggles of the biggest bug-bottle or the fattest moth. The silk of some tropic species will even hold small birds.

The cobwebs which are the bane of the housewife are mainly the debris of the funnel-shaped webs of the common house spider. These traps are much denser and more untidy-looking than the garden spider's wonderful creation.

There is a little spider which is a great aviator. Naturalists tell us that the upper regions of the air are sometimes alive with millions of migrating spiders, borne through the air on filaments of silk. Usually these spiders take off in vast numbers from grass stems and, when desirous of landing, simply haul in the threads and sink to earth.

But the common water spider is perhaps the most ingenious of the tribe, for he anticipated the diving bell and the "bathysphere." The spider's experiment of pressing an inverted tumbler into water demonstrates the fact that the imprisoned air actually prevents the entrance of a single drop and leaves the inside of the glass dry. That is the principle of the diving bell.

The water spider actually spins a silken envelope among submerged plants and insects. The spider enters the bell is constructed so that its mouth points downwards, and in this air-filled chamber the female deposits her eggs. Should the air supply become low, some of it is released by lifting one edge of the bell mouth.

Overseas Bacon Trade

Alberta Looking Plans To Develop More Business

More business for Alberta from the overseas bacon trade is aimed at in a new policy about to be put into operation under the direction of the provincial department of agriculture. An aggressive campaign is to be conducted for improvement in quality of hogs produced in the province, one of the chief features of the plan being a hair boning scheme, under which small bonuses will be paid to purchasers of approved hogs.

Hon. George Healey, Minister of Agriculture, in announcing the new policy, says that it will be operated jointly with the Federal Department of Agriculture and the Federal food, meat, railways packing companies and stockyards will co-operate on the full campaign.

Research Expedition

Swedish Geologist To Study Formations In Antarctica

A well-known Swedish geologist, Dr. Carl Cullenius, has been commissioned to undertake a most interesting research expedition to Australia and New Zealand. Dr. Cullenius is the foremost pupil of the famous Swedish geologist, Prof. De Geer, and will apply the De Geer research method to the geological formations of New Zealand and Australia.

Dr. Cullenius' expedition will investigate a highly interesting formation near Christ Church in New Zealand, where no less than some 13,000 sedimentary year strata can be seen and measured.

Earned His Name

Yowls attracted felines at Lynbrook, N.Y., to a crevice between two buildings. They found a dog—very small and very frightened—wheeled fast. For three hours they worked and finally got him free. No one in the crowd of onlookers stopped to claim him so the fireman said: "I guess he belongs to us now, and from now on his name will be Squaw."

Predict Severe Winter

Wild geese gathering in flocks and flying south, two months earlier than last year, betoken an unusually early and severe winter, according to old-timers in the vicinity of Grimshaw, Alta. One former also reports that geese on his farm have been extremely busy recently hatching in winter supplies.

"It pays to be nice to the people you meet on the way up, for they are the same people you meet on the way down."

W. N. U. 2013

PASSING OF ARABIAN MONARCH SHOCKS THE EAST

The sudden death, from heart trouble, of King Faisal, of Iraq, while in Switzerland, was a great shock to his subjects and also to Europe. This summer the ailing king left his capital, Baghdad, and paid a visit to several of the European capitals, including London, where he was a guest of King George. He had interrupted a course of treatment at Berne to travel to London for a conference in connection with the Assyrian troubles in his country, and was on his way home. Only 48 years of age, King Faisal was one of the most romantic figures in the East, and during the war became famous for his battles against the Turks in Arabia. The picture at the left shows him when he opened the first rail bridge to cross the great river Euphrates and which forms a new and better gateway to the West. At the right King Faisal is being greeted by King George on his arrival in London recently. The Duke of York can be seen behind the Arabian monarch.

Young Calves Require Milk

Farmers Have Found Animals Cannot Thrive Without It

Calves, according to the best authorities, should have new milk or whole milk until they are from two to four weeks of age; after that it is advisable—almost necessary—that they have skim-milk until they are three months of age. It can then be discontinued if the calves are consuming a good grain ration and getting a good grade of legume hay. Should one have not enough skim-milk at least ten pounds daily per calf, it would probably be advisable to secure some skim-milk powder to piece out the fresh skim milk. Mix one pound of powder to nine pounds of warm water. Feed this skim-milk at about the rate of 12 to 15 pounds daily with a grain ration of four parts cornmeal, two parts ground oats and one part bran. Start the calves on the grain as soon as they will eat it. It should be fed with a good legume hay.

If the calves are doing well, the skim-milk can be reduced to about one-half when the calves are two and one-half months of age and discontinued entirely at three to four months, when they should be taking somewhere between two and four pounds of grain daily. With plenty of good legume hay, this grain ration will not need to be increased as the calves grow older.

Buttermilk powder can be used in place of the skim-milk powder in exactly the same way, with approximately the same results, although the calves will have to become accustomed to it rather slowly, or it may cause a little scouring.

Make More Creamy Butter

Saskatchewan Output Higher Than To August Last Year

The output of creamery butter in Saskatchewan for the month of August amounted to 2,627,738 pounds, which is an increase of 743,000 pounds or 39.3 per cent. over the make for the corresponding month of 1932. The output of the month is the highest ever reported for August in the history of the province.

A total of 15,137,202 pounds of creamery butter have been manufactured during the first eight months of 1933 compared with 13,463,492 pounds in the same months of 1932, the increase amounting to 12.5 per cent.

Action Against University

Action against the University of Alberta governors by seven residents of England, who claim the \$30,000 estate left by the late Henry Russell, of Del Bunta, Alta., will go to assist in the building of the Alberta supreme court's first sitting in 1934, according to an order granted by Mr. Justice T. Tweedie.

last two fiscal years.

Czechoslovakia exports recently have been the lowest in the history of the republic.

Nemesis was the Greek goddess of retribution.

Britain Is Healthy

General Health Better Now Than At Any Time In History

Sir George Newman, chief medical officer of the Ministry of Health, first Britain healthier now than at any time in her history. Unemployment has not resulted in any general increase in sickness and the death rate in areas hit most by the depression actually has been reduced.

The birth rate in 1932 was the lowest ever recorded, but better care of newborn babies has resulted in the saving of an average of 40,000 infant lives annually.

"If a halt is not called in indiscriminate dosing of foods with vitamins, there is a possibility of disturbance in the balance of nutrition which may have far-reaching effects, and which it is not unreasonable to contemplate with some uneasiness," the medical officer continues.

Not Providing For Future

Pitcairn Islanders Believe End Of World Is In Sight

The end of the world is in sight, according to the inhabitants of Pitcairn Island, Southern Pacific Ocean, and they are making no provision for the future. They are not planting young coconuts, they are not storing up anything for the future. The 193 people on the island are the descendants of English sailors who mutinied on H.M.S. Bounty in 1790, and Tahitian women.

Such Rudeness

"He stared at me," she complained. "He had red hair and bushy eyebrows and a gray felt hat and a mole on his chin, and a brown suit and a grey tie. And he looked at me as if he wanted to take in everything I wore—the rude fellow!"

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

He: "Yes, I'm a travelling man."

She: "Good! Let's see how you do."

Preparing New Craft To Salvage Treasure

Inventor Hopes To Reach Sunken "Lusitana" In Baby Submarine

Simon Lake, submarine inventor, of Bridgeport, Conn., is making preparations for an expedition that had for its ultimate goal an attempt to reach the fabulous sunken treasure of the "Lusitana."

The baby submarine, "Explorer," most recent of Lake's inventions, and a tender, the ship, were being made ready at the old government shipyard on the Houston River.

Lake said the expedition planned to explore the waters of the Atlantic and Caribbean, in the baby sub, recovering sponges and pearls at depths hitherto impossible to divers, before turning to the "Lusitana."

Although no definite date was set for the start of the expedition, the feverish activity pointed to an early departure.

Lake said the expedition would go first to the Bahamas Islands for sponge fishing, with a side voyage to Tarpon Springs, Fla. for the same purpose.

The expedition then will try to salvage bullion from the hulks of sunken ships along the Atlantic Coast, Lake said, before making its supreme effort to retrieve a fortune, reputed to be \$4,000,000, from the treasure room of the "Lusitana," off the Irish Coast.

Chinese Lose Millions

Huge Fund Raised To Resist Japanese Invasion Blunders

A scandal involving millions of dollars raised as a "war chest" to finance the defense of Manchuria against Japanese invasion two years ago was ordered investigated by the government authorities.

Chinese losses who fought and bled—and ultimately died—are wondering what happened to nearly 20,000,000 silver, the equivalent of \$2,500,000 in Canadian currency.

The extent of the scandal was revealed with the return to China of General Ma Chao-shan, hero of the Nomen river battle in Manchuria, who finally was forced to flee to Soviet Russia and came back by way of Europe.

On his return, General Ma was acclaimed as a national hero and named member of the National Executive Council. He soon resigned, however, and from retirement let it be known that of the 26,000,000 Chinese currency raised by voluntary subscription to carry on the fight against Japan, he and his associates got only \$173,000.

Producing More Butter

Creamery Butter Production Increases By Nearly 3,000,000 Pounds

An increase of almost 3,000,000 pounds was shown in creamery butter production in August last year, the amount was 27,670,954 pounds as compared with 24,382,690 pounds in the corresponding month last year, says a report issued by the Dominion Bureau of Statistics.

Quebec led in production with 8,400,000 pounds; Ontario was second with 8,629,129 pounds and Alberta third with 2,407,000 pounds. Production in other provinces was as follows: Manitoba, 2,072,818 pounds; Saskatchewan, 1,885,705; Nova Scotia, 662,582; British Columbia, 499,792; New Brunswick, 428,520; and Prince Edward Island, 354,000 pounds.

Canada Beats Previous Records

Wheat, Tobacco And Plum Exports To British Isles Higher In 1932

In 1932 Canada beat three of her previous records for exports to the British Isles, viz., wheat, 48,474,000 cwt., against a record of 41,005,000 cwt., in 1928; tobacco, 10,544,000 pounds against 9,275,000 pounds in 1931; plums, 20,000 cwt., against 18,000 cwt., in 1928. Not only did exports of wheat compare a record for supplies going to the British Isles from Canada, but the 1932 total has never been exceeded by any country except during the war years of 1916 and 1917—Marketing, Toronto.

Trans-Canada Highway

Coast-To-Coast Motor Road Ready Within A Year

Canada will likely have a coast-to-coast motor highway by this time next year if the present plans of the Ontario government work out. It will involve the use of lake steamers to bridge one gap of some 300 miles, but while the long-noted trans-Canada Highway will not be an actual fact it will be possible for a motorist to travel from Halifax to Vancouver without leaving Canadian territory.

Italy had more tourists this year last, but they were not as high as spenders as those of other seasons.

An Effective Lightning Rod

New York's Empire State Building Is Good Signpost

The Empire State Building in New York City is the tallest, most elaborate and most successful lightning rod ever erected by man. Time and time again it has been struck. In fact, hardly a thunderstorm sweeps over lower Manhattan island that does not strike it out to hurt a bolt. It is lowering morning mast. No one in the building is aware that flashes which may have a potential of 10,000,000 volts at times are drawn to the mast, only to be dissipated by the intricate steel structure into the ground.

One once electrical apparatus connected with a weather vane on top of the building was fused. But probably the safest of all places in New York City during a thunderstorm is an office in the tallest of steel structures.

It has been known ever since Franklin's time that an electric spark—and lightning is nothing but a huge spark—picks out the tallest of two points presented to it. So it is with the Empire State Building. Its enormous steel frame protects not only itself but all the buildings near it. A piece of stone may be knocked off when a spark leaps between two isolated points. With the stopped-back construction this entails no great danger. The stone falls on a terrace. Even if it struck the street the odds are many to one against its killing anyone, for any one for the simple reason that everybody rushes for cover during a storm.

Experiments which were made by Faraday and later by Sir Oliver Lodge proved conclusively that the steel frame and plumbing system of a skyscraper is the energy must be divided and subdivided, and that a single drop is very effective. And a battlement or a mansard line—in fact, any steel shape—is also a fine place for steel during a thunderstorm. It is best to keep away from the metal hull—Toronto Telegram.

"Lucky Seven" Explained

Ancients Had Reason For Thinking It Symbol Of Good Fortune

Every number, according to the ancients, had special qualities—just as each number had sex, the odd numbers being male and the even numbers female. The number seven, in particular, was held in high place as the symbol of good fortune, not to any quality of the number as such, but because it consisted of three and four numbers, the meriti of both. Three is an important because it consisted of one, which stood for man, and so was the symbol of life. Four was the number sacred to Jupiter, king of the gods, and the symbol of effort rewarded. Seven, therefore, contained all the most important numbers, three and all the material importance of four, and any matter in which that number entered could not be fortunate. The number seven, which is the number of a seventh child is held in high place in the Bible. In fact, the number is mentioned more than 300 times in matters of importance in the Scriptures.

Holland Wants New Flag

Thinks National Colors Should Be Orange, White And Blue

Holland will have a new national flag if a movement to that end is successful. Those advocating the change say the present red, white and blue should be altered to orange, white and blue. Red has appeared in the Dutch flag for 300 years, but many Dutchmen want orange, white and blue because orange, white and blue were the colors of Prince William of Orange, founder of the present dynasty, whose tercentenary has just been celebrated.

Test Resistance To Disease

Resistance to disease is now being gauged by a chemical color test, in Paris. A small amount of saliva is put into a test tube with other ingredients. The resulting colors range from near transparency to deep violet. Under the test a clear liquid or pale rose would denote health, while orange, lemon or other shades would indicate various illnesses.

Really No Change

Princeton University's new theatre will permit the entire audience to see and hear equally. But, says the New York Times, to avert a complete break with the past, people will still be able to crawl over their neighbors' seats by buying seats away from the aisle and coming in late.

London has a flood of counterfeit coins.

Gypsies"

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. He is the adopted daughter of a wealthy family, and she is a poor, struggling sculptor. On their first date, Peter spends most of his money to take her home. Camilla is good time, and Peter must give her up because he cannot stand the financial pressure. She, however, stays the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich or at least, will not inherit the Hoyt fortune. Peter, in turn confesses he is practically penniless. They fall into each other's arms. Together, in the park, Peter and Camilla try to arrive at some compromise for the future. Peter, Camilla's foster mother, suspects from Camilla's actions that a romance is brewing. She is anxious to see Camilla wed well.

(Now On With The Story)

CHAPTER X

It was not long after Camilla knew that "Pa" Lorenz was her father that he had been killed in the accident at the foundry, thus taking him out of her life almost as soon as he had entered it. The industrial insurance had saved the family's humble home and with three or four of the children working all the time and living at home, Mrs. Lorenz managed a strait existence.

She rather gloried in her newly acquired authority and independence, only partially assumed by young Henry, who had taken his father's place in the shop. He was a sub-foreman now, and more popular than his father had been. He carried none of his antagonism and resentment of inferiority. He was the son of a young American. The Lorenzes lived in a section built up of thirty laboring home owners, where women who had toiled mercilessly in European fields now used electric washers and vacuum cleaners, and found time to chat over back fences and linger to delicious bits of gossip on the street and from the market.

Their faces grew brighter and their accents less pronounced, as their clothes grew more shapely and their clothes less shabby. Patches of lawn and clipped hedges and flower beds in the rows of frame houses that had been built from one blue-print, with flowers and vegetables flourished in the back yards for beauty and economy. Pungent, spicy odors were wafted from open doors and windows to the four winds, and children laughed and cried and played ball in the streets.

Such was the environment that Camilla learned was hers by right of birth; but however hard she might try, she knew that she never could adopt it for her own again. There were times when she wished devoutly that she had not been selected from that wilderness as a rare flower to be transplanted in the sheltered atmosphere of the conservatory. But her studies at National had dissipated all notion, and her meeting with Peter had totally dismissed it. That was why her sudden change of attitude aroused Mrs. Hoyt's curiosity to no purpose.

Camilla thought, "She will have to meet him sometime. I can't see him all summer and prevent it. She might even like Peter. I don't see how she could help herself." Aloud, she replied, "If you wish."

Peter looked his best in evening clothes, as all handsome men do, and all plain men do not. Camilla was delighted that Mrs. Hoyt seemed to be impressed favorably with him. Of course, her attitude could make little difference in their lives. So far as Camilla was concerned, Mrs. Hoyt had nothing to do with their future. Her own plans had provided for that. Only her approval of Peter would make the summer less difficult when she discovered that Camilla was coming home often. She would dominate Camilla until the day she left her house, however, independent she might try to be.

"Camilla tells me you are one of the best students at National," Mrs. Hoyt began in the subtle manner which Camilla had learned was the first item in the long questionnaire

Such circumstances inspire women's confidences. She displayed a growing interest in seeing that Camilla looked just right.

"You suggest to be happier of late," she guessed pleasantly, one evening.

"Am I?" asked Camilla. "Yes, perhaps I am. School will be out soon." "Are you so tired of studying?" hopefully.

"Oh, no. Just anxious for September and the beginning of real work," she replied easily, letting a cloud of rose-tinted suede lace fall over her head and shimmer into folds around her neck-chick ankles.

For one thing, Camilla rejoiced in spite of her resentment over her false position as Camilla Hoyt—that her wealth provided her with beautiful clothes just now when she wished to appear her loveliest in Peter's eyes. Of course, he would love her just the same if she wore rags—or a shawl—like told herself. Every woman believes in that support, but the more she put it to the test. A misplaced look of half a shy nose, an unbecoming gown—she lives in a continual dread of her lover's discovery of these nears to whatever she wears.

"May I ask where you are going this evening?" Mrs. Hoyt continued casually.

"The art school classes are having dance in the auditorium of Peter."

"Oh! Is someone taking you?"

"One of the students," Camilla replied easily, but her heart beat furiously at the mere thought of Peter.

"Do I know him?" Family introductions and long acquaintances were of paramount importance in Mrs. Hoyt's social world.

"I don't think so. His name is Anson—a senior."

"Goodness, it sounds—Surreish!"

"Is it I suppose it is. All I know is that he is one of the honor students."

"Now do go with The Story"

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

"I'm walking—It's only across the park."

DRAPERIES MADE NEW

"When we resumed housekeeping a month or two ago, my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted."

"I was heart sick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for fading or dyeing—and never take the life out of cloth as other dyes do."

MRS. J.F.T. Montreal

of character, history, ancestry, social status and financial rating.

Peter was modest. "That may be, but Miss Hoyt only tells nice things about everyone."

"Oh, have you known her for long?"

"Only since I went into Professor Drake's class as a critic."

"A critic?"

"Yes, I had taken his work two years ago. I wanted to find out if I had improved any," his smile was charming, and included Camilla.

She moved toward the hall anxious to escape the rest of the list of questions. "We are late, now, Mr. Anson. I think we had better be going."

Mrs. Hoyt followed them to the door. "Your car—where is it?" she exclaimed with alarm, as if she only saw the car when she saw the owner waiting outside.

"We're walking. It's only across the park," said Camilla, and Mr. Anson lives near the door.

"That's ridiculous, Camilla," she turned to Peter. "You must not let her queer notions, Mr. Anson."

"I like the walk myself," Peter defended her, bowing a courteous good-bye.

Making Liners Cooler

Cunard Company Finds White Paint Reduces Temperature Many Degrees

The Cunard Line has announced that the "Mauretania" had been so well received as an all-white cruising liner that they have decided to paint the liner "Prinzessin" white before the beginning of her world cruise next January.

H. P. Borer, general passenger manager of the line, said that the cruises of the "Mauretania" had reported to him on a series of scientific observations taken on the "Mauretania" during cruises to the West Indies. They took similar readings last year on identical cruises and have reported that the liner is from seven to nine degrees cooler in her white dress.

"I didn't believe it at first," Mr. Borer said, "and thought it as just a stunt. But they produced the figures and scientific data to show that a white ship must be cooler than black one. So I capitulated."

The "Mauretania," still one of the swiftest liners afloat despite her age, has proved popular in the cruises. On September 27 the ship will be sent to England for a month for repairs. In November she will be back again for a series of cruises to last until April.

THE RHYMING OPTIMIST

By Aline Michaelis

THE FADED TAPESTRY

Her life is like a faded tapestry Whose colors have grown paler with age. Of every one-time vivid flower and tree.

The shadow only, dim and vague, appears. Day after day has shed its rays of light. And the carresses of those golden beams.

A part of asphire, rose and jade The picture now as pale as moonlight gleams.

A faded tapestry, which takes from time An added beauty as the seasons go. So softened, rendered mystic and sublime.

With loveliness no crude, new thing can show, We see our life grown fairer at the end. Which glamour years, and years alone intend.

Some Cures For Insomnia

Plenty Of Recipes Given From Which To Choose

Sleepless night? Try these favorite recipes from all over the world for winning the favors of Morpheus. Count the number of people you know.

Plug your ears with cotton. Reckite Kalls "Ode to Sleep." Read the Bible.

Try to recall a previous dream and "think" yourself back into it. Double figures—twice one, twice two, twice three, and so on. If sleep does not come, you are used to find it easy to reach 16,777,216 when the combinations of seven leads the brain.

Place a pad of lint or rag, wrung out in cold water, on the pulse of the left wrist, then bind it with a handkerchief.

Munch a hard crust. And sleep with the head to the north, in line with the earth's magnetic currents.

Has Slim Chance Now

If Motor Cars Speeded Up Pedestrian Will Have Hard Time

The pedestrian has a hard enough time as it is, he must keep quickly with a car coming dead at him at 40 miles per hour. If the speed of the car were stepped up to 125 miles per hour, he would have no chance whatever. If he stood still he would be struck so hard that identification would be difficult. If he jumped with sufficient agility to escape he would have to strain his back and injure his head in the process.

The extent of the jump which he makes today would be a futile gesture. The leap which would deliver him from a car speeding at 40 miles per hour would be of no use whatever when pitted as a safety measure against one speeding 125 miles an hour.

Won His Bet

The people who work on one of the bascule farms in Ontario got a surprise by seeing a young man drink five pounds of extracted honey in 15 minutes. He won the bet; the bet being that he could drink the pounds in 15 minutes, the owner was to give him 25 pounds. If the young gentleman could not drink the honey in the time set he was to pay for the five pounds.

Longest Lived Trees

Older than the pyramids or sphinx of Egypt—Older than the city built by Cain—Many of the "Big Trees" of California have been seedling when Adam walked the earth. English Oaks are also some of the longest-lived trees now standing which were large enough to cut for lumber when the mailed Knights of William the Conqueror landed in the year 1066.

Good Motto To Adopt

Eastern Truck Company Forbids Employees To Hog Road

Printed on one large transport in Eastern Canada are words: "Our motto is courtesy. If this truck goes by, notify this company." Many people wish that every transport and bus company would not only adopt but practice this motto. The way to practice it is to give the drivers of large trucks and buses the centre of the road is dangerous to general traffic and those in authority should make an example of some of them in an endeavour to show that the business or pleasure car has some rights on our highways.

New Fire Escape

A new life-saving device which can be attached to any window; has been invented in Germany and was tested recently in Berlin. Two ropes are thrown to the ground, where passers-by catch them and control the descent of the escaping person. In the test a man and a girl descended from a skyscraper.

Flamings in North Africa are building nests, some of which are conical structures rising two feet above the water level.

More than 30 per cent. of the people now in insular employment in Britain are women.

Changed Into Land Animals

Royal College Of Surgeons Experimented With Mexican Fish

Fish have been changed into land animals by members of the Royal College of Surgeons, in London, England.

The fish selected for the experiment were Mexican salamanders, which normally spend their lives in water. They were fed with thyroid gland and a month later the gills and tails had completely disappeared, eyelids developed—and the salamanders struggled from their tank on to the shore. —J. H. Thom.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver. Be a Calender necessary

For you to feel healthy and happy, you must have your liver in good condition. If it is not, you will feel wretched. Every day, without that, you will feel wretched. Every day, without that, you will feel wretched.

How can you expect to live in a situation like this? You must have your liver in good condition. If it is not, you will feel wretched. Every day, without that, you will feel wretched.
